**HUDSON**  
INSTITUTE OF MEDICAL RESEARCH

# Early pregnancy and a healthy start to life

## Let's talk! The science of reproduction

**WHEN** Thursday 12 September 2019  
5.30pm – 7pm

**WHERE** Hudson Institute of Medical Research  
Translational Research Facility  
45 Kanooka Grove, Clayton  
(Adjacent to Monash Medical Centre)

### Ever wondered what happens at the very start of pregnancy?

Join us as we help you understand how our research discoveries can help improve your reproductive health

Hosted by the Centre for Reproductive Health, our world-renowned scientists will guide you through their cutting edge research in fertility and pregnancy.

*We cannot guide your personal clinical care* but we will highlight how scientific research underpins advances in medicine

### Come hear our experts' research stories, ask questions and learn more!

#### 'ASK THE EXPERT'

Hear from our panel of researchers and ask your reproduction questions

**Prof Beverley Vollenhoven** | IVF fertility clinician

**Dr Jemma Evans** | Endometrial biology and embryo implantation expert

**Dr Nicole Kellow** | Expert in nutrition; studying optimal diet for conception

**Prof Guiying Nie** | Placental biology expert

**Ms Mary Mansilla** | PhD student; placental biology
